

BAKING WOODEN TRAYS

Lacroix Group offers high quality trays, thanks to poplar which is a fast growing tree, with strong and hardwearing wood.

The wooden trays are manufactured without using chemicals and have food contact capabilities. What makes our trays so ideal for your products? The high capacity of our trays to resist high/low temperatures. They can be used in many food sectors : from the cheese industry, ready-made food industry to bread and pastry industry.

On our website you will find the full range of our baking trays

www.groupe-lacroix.com
